

Klim Sarakeev

R&D Engineer — Automation & LLM Integration

truuuuer@gmail.com · Dilijan, Armenia (GMT+4) · github.com/TruerDev · truer-web.netlify.app · linkedin.com/in/klim-sarakeev

PROFILE

R&D Engineer building internal automation and LLM-powered tools from scratch. Background spans browser automation, multi-agent AI pipelines, and API-driven workflow systems. Experienced in building systems with data integrity requirements, structured audit logging, and reliable processing under high operational load. Comfortable owning full development cycles — from translating business requirements to production deployment — in fast-moving environments with minimal oversight.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (Node.js), Python, SQL
Backend	Node.js, PostgreSQL, Redis, BullMQ, REST APIs, Webhooks, OAuth, Supabase
AI / LLM	OpenAI API, Anthropic API, prompt engineering, multi-agent pipelines, familiar with LangChain architecture
Automation	Puppeteer, Chrome Extensions MV3, browser automation, webhook-driven workflows
Frontend	React, Next.js (App Router, Server Components)
Tools	Git, GitHub Actions, Zod, Drizzle ORM, Pino, Jest, pytest

EXPERIENCE

R&D Engineer · MST · Remote Nov 2025 – present

- Built **GAM-Pro** — internal browser automation and Google account management platform covering the full account lifecycle; reduced the operational team headcount from 8 to 1.
- Built **Ads Combine Pro (ACP)** — a 7-agent LLM orchestration system for performance advertising automation using OpenAI and Anthropic APIs; covers briefing, creative generation, targeting, and campaign launch.
- Built **CTS Anti-Fraud Analytics** — internal system that automates ad data pipelines, detects anomalies, and surfaces fraud signals with structured event logging for audit purposes.
- Integrated WebSocket streaming, step execution handlers, and browser context awareness into ACP; 93+ unit tests across the platform.
- Mentored a junior engineer; led full project handoff with documentation and task structure.

Digital Marketing Operations · MST · Remote Mar 2025 – Nov 2025

- Managed 100+ ad accounts across 20+ countries in high-volume, high-risk performance advertising verticals.
- Identified manual workflow bottlenecks that became the foundation for GAM-Pro.
- Transitioned to R&D role after 8 months based on self-initiated tooling proposals.

PROJECTS

- FinTrack** · Next.js, TypeScript, Supabase Postgres, Drizzle ORM, Zod, Recharts
Personal finance tracker with multi-currency support, budget management, analytics dashboards, RLS security, and PWA support.
- t_report** · Python, FastAPI, SQLite, T-Bank Invest API
Investment portfolio analyzer for MOEX: live data ingestion, risk decomposition, backtesting engine, and LLM-powered trade recommendations.

EDUCATION

Computer Information Systems Vyatka State University College, Kirov · 2021 – 2024
